

COMPONENTS

Bogie maintenance

Our range of services:

For the processing of bogies we possess certified workshops with trained personnel and modern facilities. We work on bogie construction types as trailer bogie or motor bogie. Our ser-

vices include bogies with shoe brake or disc brake assembly, electro-magnetic rail brake, wheel disc brake assembly for multi-unit rail cars, passenger cars, freight cars as well as special vehicles.

Our services include the following repair levels:

Refurbishment according to customer-specific requirements

- Chassis reconstruction or exchange
- Reconstruction or modification works

IS-D1 – Demand repair with BR1

IS-D2 – Revision with partial refurbishment

- Wheel set exchange (optional)
- Partial surface treatment (special work)
- Brake test
- Brake refurbishment BR2 or BR3

IS-D3 – Complete refurbishment

- Complete demounting of bogies
- Testing of constituent parts (NDT)
- Surface treatment (special work)

- Wheel set exchange Brake refurbishment BR3
- Brake test
- UT, MT and PT testing of hazardous areas or basic NDT testing
- Chassis restoration
- Repair of accidental damages, accident maintenance

For these operations our workshops are equipped with:

- Optical 3-D measuring
- Spring testing facilities
