

CLEANING

Industrial cleaning and slackening of compressed gas tanks

Our range of services:

In order to make your tank cars available again after a maintenance, tank test or a product change, we are offering cleaning services for nearly all products of the mineral oil, liquid gas and chemical industry. Due to modern industrial cleaning facilities and our own biological waste treatment

facilities our qualified specialists are working rapidly and reliably on your vehicles. Accumulated residual material loaded is being professionally cleaned up respectively disposed of in compliance with legal requirements. This guarantees the flexible operation of your waggons for the next loading.

Our services in the field of industrial cleaning and slackening of compressed gas tanks include:

- Interior and exterior cleaning of chemical and mineral oil tank cars, as well as freight cars and other rolling stock
- Slackening of compressed gas tanks and inerting (nitrogen purging)
- Cleaning according to UIP cleaning key
- Graffiti removal
- Generating interior and exterior reports
- Bating, passivating, interior blasting
- Repair of rubber coating
- Cleaning product list on request
