

MODIFICATION AND RE-DESIGN

Conversion from grey cast iron to LL brake shoe soles

In order to reduce the rolling noise of freight waggons, the noise has to be minimized directly at its point of origin, at the wheel-rail-contact. Therefore the freight cars have to

be converted to LL brake shoe soles in the following years. We are your reliable partner for conversion work – so that your freight waggons are braking on silent soles.

Our range of services:

- Technical assistance and support concerning sponsorship, application and documentation
- Clarification of questions concerning cost amortization and future projects
- Intensive cooperation with the responsible ECM/owner
- Realization of the LL brake shoe sole installation
- Support with the adaptation of maintenance plans
- Preventive care for freight waggons before, during and after the installation of the LL brake shoe soles
- Provision as well as support concerning material procurement

For more information please contact our sales team.

RailMaint GmbH is leading in the field of maintaining and refurbishing rolling stock of the freight and passenger traffic sector. Our maintenance services, products and Mobile Services sustainably strengthen the availability, reliability and durability of our customers' rolling stock.
